LUXURY CHARTER & SUPER YACHT CUSTOMERS

WHY SIMPLE GREEN?

Protects Premium Materials:

Helps safeguard delicate materials like gold leaf, exotic woods, vinyl, and carbon fiber.

Meets Maritime Regulations:

Complies with MARPOL, IMO, and EU Ecolabel standards.

Fast and Efficient Disinfection:

Ensures rapid turnover between high-profile guest charters.

Non-Caustic & Multi-Surface Effective:

Cleans a variety of surfaces and materials without harsh chemicals.

Safer:

Eco-friendly, biodegradable* formulas that are safer for guests, crew, and marine life.

Versatile and Cost-Effective:

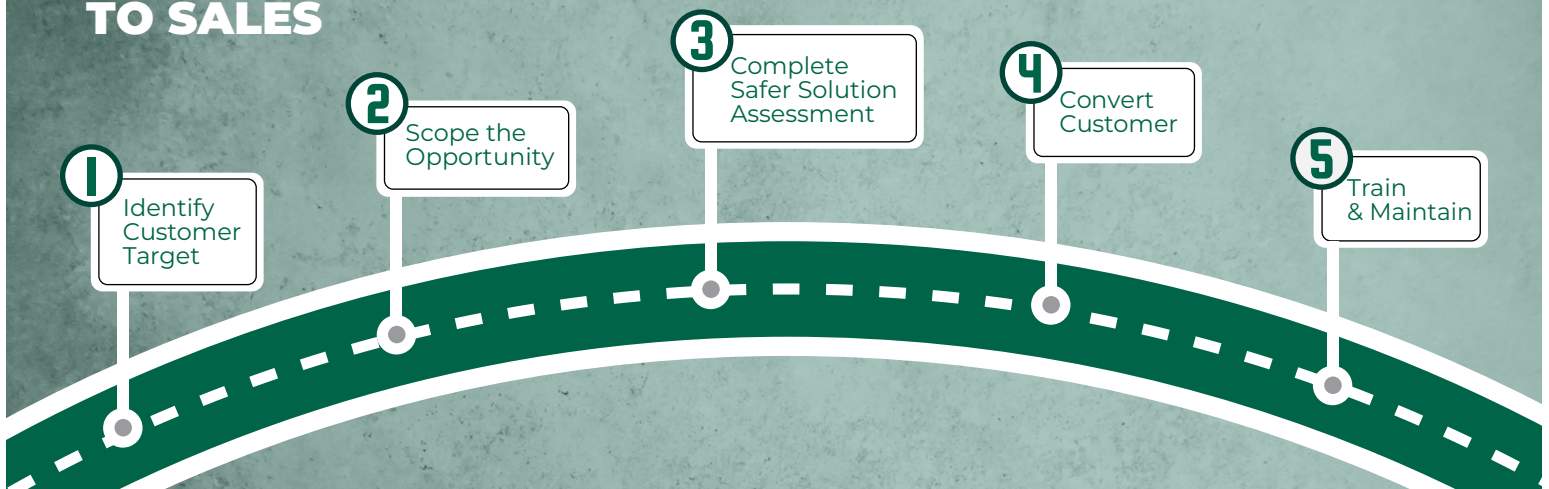

Reduces onboard product inventory by offering multi-surface cleaning solutions; concentrated formulas can be economically diluted.

Supports Environmental Compliance:

Helps yacht owners meet greywater discharge, residue-free surface and VOC regulations.

* Biodegradable formula reaches 100% biodegradation within six months when disposed into a sanitary sewer or septic system (per OECD 301D extended testing).

ROAD MAP TO SALES

TRANSPORTATION

WHO TO CONTACT

- + Yacht Captains/Chief Engineers
- + Yacht & Charter Fleet Management
- + Pursers & Provisioning Agents
- + EHS Managers/Compliance & Sustainability Officers
- + Yacht Builders, Brokers & Refit Shipyards
- + Galley Suppliers/Helipad Maintenance

APPLICATIONS

Underwater Hulls

Interior Surfaces & Quarters

Engine Rooms

Outdoor Upholstery & Cushions

Teak Decks

Anchor Chains & Lockers

Deck Equipment

Stainless Steel & Windows

Galley Areas

Tenders, Jet Skis & Toys

HVAC Ducts & Vents

Bilges & Mechanical Bays

TOP NEEDS

- + Maintain Luxury Appearance
- + Prevent Corrosion & Buildup
- + Odor Control
- + High-Touch Surface Sanitation
- + Minimize Harsh Chemical Storage
- + Preserve Material Longevity
- + Safety & Environmental Compliance
- + Fast Cleaning Between Charters
- + Eco-Responsible Solutions for Clients

QUESTIONS TO ASK POTENTIAL LUXURY CHARTER & SUPERYACHT CUSTOMERS:

1. What cleaning products do you currently use? How effective are they?
2. What cleaning challenges do you face in engine rooms or technical spaces?
3. How do you manage galley sanitation during charters? Are you using VOC-free or food-safe cleaners in guest or crew areas?
4. What concerns do you have about chemical safety onboard? Are you looking for eco-friendly cleaning solutions?
5. Are your current cleaning products safe for carbon fiber or stainless finishes? Are they safe for exotic finishes?
6. How do you manage mold or odor in HVAC systems?
7. Do you need bulk solutions for helipads, underwater hulls or tender fleets?
8. Are you concerned about product runoff or wastewater disposal? Do your products meet international environmental standards like MARPOL or EPA?

SOLUTIONS FOR LUXURY CHARTERS & SUPER YACHTS

Simple Green products are specially formulated to meet the high standards of the superyacht industry, offering effective cleaning solutions without compromising luxury materials or environmental regulations. Unlike harsh chemical cleaners, Simple Green's non-caustic, biodegradable* formulas clean effectively while protecting sensitive surfaces like teak, carbon fiber, and marine coatings. Whether it's for interior detailing, engine room degreasing, or HVAC maintenance, Simple Green simplifies yacht upkeep and reduces crew workload. With low-odor, eco-friendly formulas, fewer cleaning steps, and enhanced safety, Simple Green ensures superior cleaning performance while extending the life of your yacht's equipment and finishes. Simple Green offers safer, efficient, and compliant cleaning across all yacht operations.

* Biodegradable formula reaches 100% biodegradation within six months when disposed into a sanitary sewer or septic system (per OECD 301D extended testing).

CLEANING SOLUTIONS FOR

Helipads

Interior Surfaces
& Quarters

Deck
Equipment

Engine
Rooms

Stainless Steel
& Windows

Teak
Decks

Outdoor Upholstery
& Cushions

Bilges
& Mechanical Bays

CLEANING CHALLENGES:

- ✦ Engine Rooms that accumulate thick layers of hydraulic fluid, diesel & lubricant requiring heavy-duty degreasing
- ✦ Cleaning teak decking that absorbs oils and gets marred by foot traffic & algae
- ✦ Non-abrasive, effective cleaning of sensitive interior luxury surfaces like leather and lacquered wood which collect spills & fingerprints
- ✦ Tenders & water toys that are prone to rubber marks, salt buildup & fuel splatter which can damage gelcoat finishes
- ✦ Aviation fuel and exhaust residues that degrade composite materials on helipads & require specialized cleaning
- ✦ Oily sheens and sludge buildup in bilge areas
- ✦ Cleaning crew quarters and heads where high humidity leads to soap scum, mold & mildew on surfaces & fixtures
- ✦ Maintaining deck equipment such as windlasses, cleats, cranes, davits & fairleads that require thorough residue removal
- ✦ Outdoor cushions, covers & chain lockers gather organic matter requiring regular surface-safe cleaning

THE SOLUTION - SIMPLE GREEN INDUSTRIAL CLEANER & DEGREASER

- ✦ Industrial-strength cleaner & degreaser that cuts through thick engine room grease & hydrocarbons without harsh solvents
- ✦ U.S. EPA Safer Choice Certified for use around people & the environment
- ✦ Micro-emulsion and pH-balanced formula cleans luxury surfaces such as teak, leather, vinyl & wood without damage or streaks
- ✦ Versatile & economic, concentrated formula can be diluted for light cleaning or used full-strength for heavy-duty messes
- ✦ Bilge cleaner emulsifies oils for pump-out to help meet environmental regulations & MARPOL compliance
- ✦ Removes aviation fuel and salt buildup from helipads & condenser coils without damaging coatings
- ✦ Non-caustic formula helps preserve luxury finishes and is safer for metals, composites, vinyl, glass, varnished wood & plastics
- ✦ Low-VOC, non-fuming, and biodegradable*, ideal for cleaning in confined spaces & around sensitive guests
- ✦ Regular use helps prevent mildew regrowth in high-humidity areas without harsh chemicals
- ✦ Multi-purpose cleaning, one easy-to-use product effectively cleans yacht interior & exterior surfaces, reducing the need for multiple specialty cleaners

**Biodegradable formula: This formula decomposes into elements found in nature within 1 year after disposal into a typical sanitary sewer or septic system*

**Teak
Decks**

**Deck
Equipment**

**Galley
Areas**

**HVAC Ducts
& Vents**

**Underwater
Hulls**

**Interior Surfaces
& Quarters**

CLEANING CHALLENGES:

- ✚ Removing heavy grease buildup from galley equipment and engine room panels that can trap baked-on grease in hard-to-reach areas
- ✚ Oil and sludge accumulation around bilge pumps that can cause odor & system clogs
- ✚ Managing minor oil & fuel spills on deck that require marine-safe spot cleaning
- ✚ Safely cleaning food contact surfaces in galley prep areas between meals
- ✚ Cleaning delicate finishes such as carbon fiber and high-gloss materials that show fingerprints & water spots
- ✚ Maintaining machinery in areas that require deep cleaning in tight spaces without disassembly
- ✚ Regular removal of salt buildup and grime from winches, windlasses & deck gear
- ✚ Maintaining crew workspaces that require fast cleanup without access to running water
- ✚ Cleaning HVAC drip pans and air handlers that are prone to mildew & biological growth
- ✚ Degreasing sensitive components like electronics and rubber seals without damage or corrosion

THE SOLUTION - CRYSTAL SIMPLE GREEN INDUSTRIAL CLEANER & DEGREASER

- ✚ Foaming action allows product to cling to vertical surfaces and bilge walls, dissolving sludge for complete drainage without runoff
- ✚ **NSF registered** (A1, A2, A4, A8, B1 & C1) for use in galley and other food prep areas
- ✚ Clean-rinsing formula cuts through heavy grease and grime without leaving harsh chemical residues behind
- ✚ Cleans carbon fiber, stainless steel & polished finishes without damaging sensitive materials
- ✚ Foaming aerosol Crystal and pre-saturated Safety Towels lift grime from hard-to-reach galley equipment crevices & allow for easy cleaning in confined spaces
- ✚ Non-abrasive and non-caustic, cleans hatch gaskets, waterproof seals & sensitive electronics without damage
- ✚ No added color or scent makes it ideal for sensitive guests and marine environments
- ✚ Versatile and economical concentrated formula, use full strength for heavy-duty degreasing or dilute for lighter cleaning jobs
- ✚ Offers easy-to-use foaming aerosol and pre-saturated wipe applications for quick onboard cleaning without heavy equipment - also lifts grime from hard-to-reach areas & allows for easy cleaning in confined spaces

CLEANING CHALLENGES:

- + Salt spray creates stubborn deposits and salt crust buildup on stainless railings, cleats, chrome fixtures & exterior fittings
- + Salt crystals and mineral scale clogs in HVAC units & desalination systems that reduce airflow
- + Hazy salt crystallization that forms on windows and glass obscuring visibility
- + Removing mineral deposits from sprinklers that can bleach and damage teak decks, compromising its appearance & lifespan
- + Maintaining jacuzzi jets, freshwater pipes, and drains that are prone to calcium & limescale buildup which can restrict water flow
- + Hard water and mineral deposits that form crusty rings on stainless steel sinks and drains, degrading appearance
- + Removing the marine growth and mineral coatings that dim underwater lighting & affect performance
- + Maintaining delicate marble countertops that have been dulled by acidic cleaner residues

THE SOLUTION - SIMPLE GREEN LIME CALCIUM SURFACE RESIDUE REMOVER

- + Loosens mineral deposits without damaging polymers, wood, or protective surface layers
- + Restores shine to chrome, stainless steel, glass, porcelain, acrylic & polished metals
- + Easy-rinse formula is **NSF registered A3** as a cleaner for food contact surfaces
- + Removes salt haze, chalky residue, and hard water stains from taps, glass, windows & fittings
- + Dissolves mineral buildup without stripping natural oils from teak and other wood surfaces
- + Clears calcium deposits from jacuzzi jets, pipes & rinse stations without harming seals
- + Low VOC formula ideal for cleaning in confined spaces, guest areas & enclosed environments
- + Ready-to-use formula delivers quick cleaning without dilution or complicated prep
- + Regular use helps maintains luxury finishes on decks, cabins & bathrooms
- + Safe for greywater systems, supporting onboard sustainability practices
- + Multi-purpose formula offers versatility, works great on everything from shower screens and tender wash-downs, to cleaning tap fittings & hull surfaces

SIMPLE GREEN LIME CALCIUM SURFACE RESIDUE REMOVER

DISINFECTION AND SANITIZATION SOLUTIONS FOR

Deck Equipment

Galley Areas

HVAC Ducts & Vents

Tenders, Jet Skis & Toys

Outdoor Upholstery & Cushions

Helipads

Interior Surfaces & Quarters

DISINFECTION AND SANITIZATION CHALLENGES:

- + Cleaning and sanitizing high-touch surfaces such as doorknobs, tender controls & bridge electronics between charters
- + Disinfecting helipad railings and equipment that can harbor bacteria from crew & guests
- + Sanitizing spa and gym areas including heated floors, pools, and gym equipment that are prone to microbial growth due to heat, moisture & sweat
- + Maintaining HVAC systems, air ducts, vents, and condensate pans to prevent the spread of mold, allergens & viruses
- + Sanitizing non-food contact surfaces in the galley such as handles and storage lids that are hotspots for listeria & salmonella
- + Germ prevention in shared crew quarters, bathrooms, locker rooms & mess halls
- + Sanitizing children's play zones and toys
- + Disinfecting greywater holding tanks and pipes which can breed bacteria without proper sanitation
- + Preventing the growth of mold and mildew and eliminating foul odors
- + Sanitizing water sports gear such as life vests, wetsuits and helmets to eliminate germs, sweat & odors

THE SOLUTION - SIMPLE GREEN CLEAN FINISH

- + Kills 99.9% of viruses in 5 seconds; disinfects in just 2 minutes
- + Kills the virus that causes COVID-19 on hard non-porous surfaces in just 30 seconds!
- + One-step, ready-to-use cleaner and disinfectant, helps speed up charter turnover & guest prep time
- + EPA-Registered disinfectant for food contact surfaces, requiring only a potable water rinse
- + Use to sanitize HVAC systems, formula penetrates biofilm in ducts and drip pans without foaming or clogging sensitive ventilation systems
- + Non-conductive, residue-free formula cleans and sanitizes polished metals, electronics & control panels
- + Prevents odor buildup in heads, spas, and wet areas by eliminating microorganisms at the source
- + Humidity-tolerant disinfection; effective at the spa, poolside & in steam room environments
- + Meets CDC/WHO maritime guidelines and health inspection documentation requirements
- + Non-abrasive, non-irritating formula allows for frequent use in confined crew & guest areas

****Staphylococcus aureus (Staph), Klebsiella pneumoniae**
2 When used according to disinfection directions
